

# Ransomware Spotlight Report 2023

**19%** increase in vulnerabilities associated with ransomware

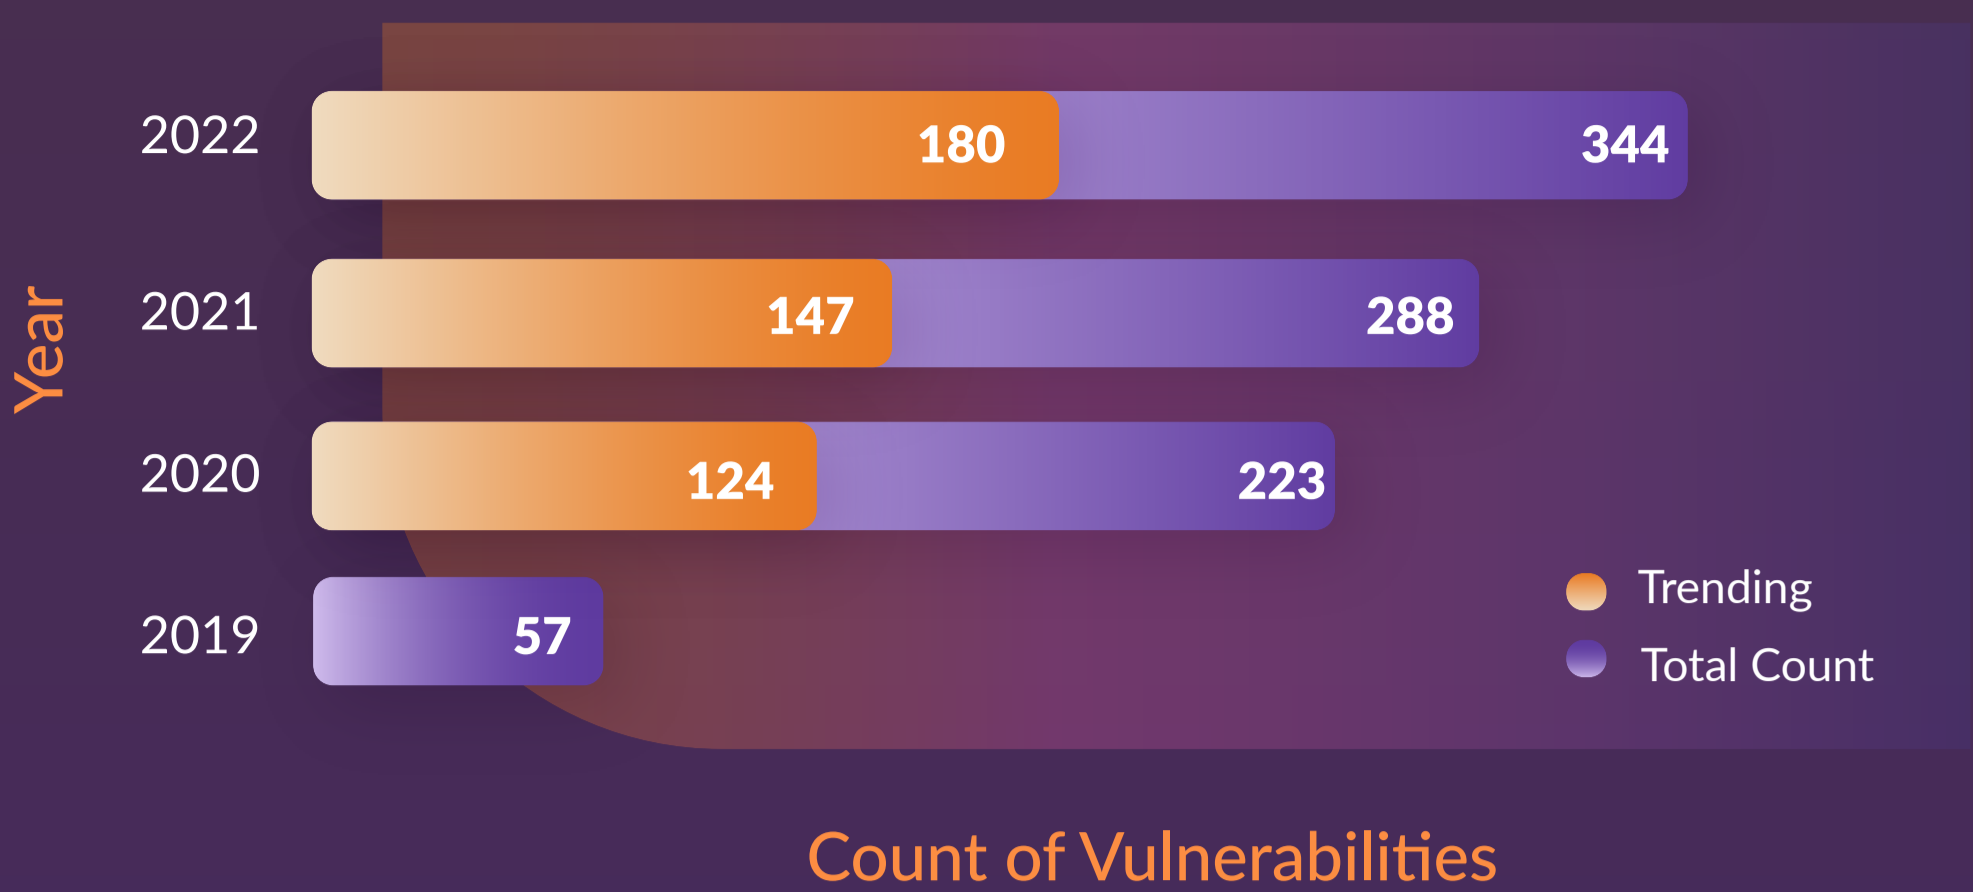

**115** unique vendors and 1,112 products vulnerable to ransomware attacks

**76%** of vulnerabilities associated with ransomware are old\*

**20** high-risk vulnerabilities undetected by scanners

\*Discovered before 2020

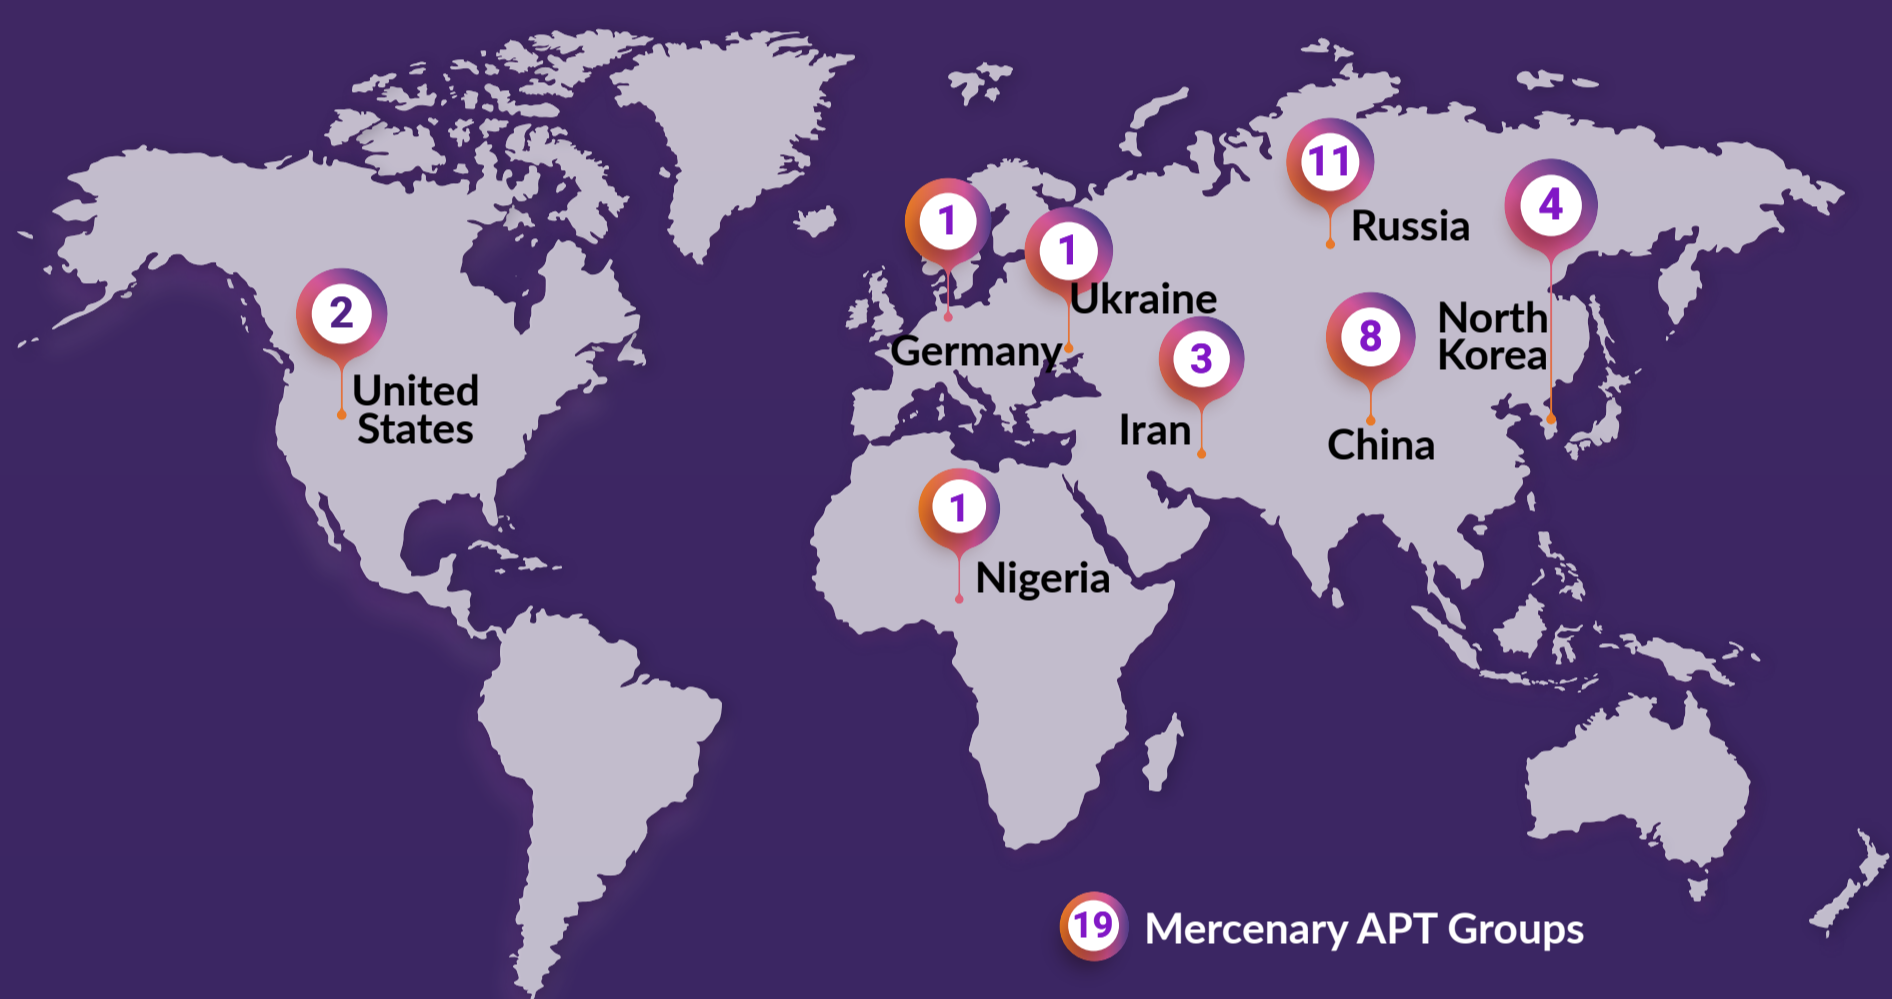

## Vulnerabilities Associated with Ransomware

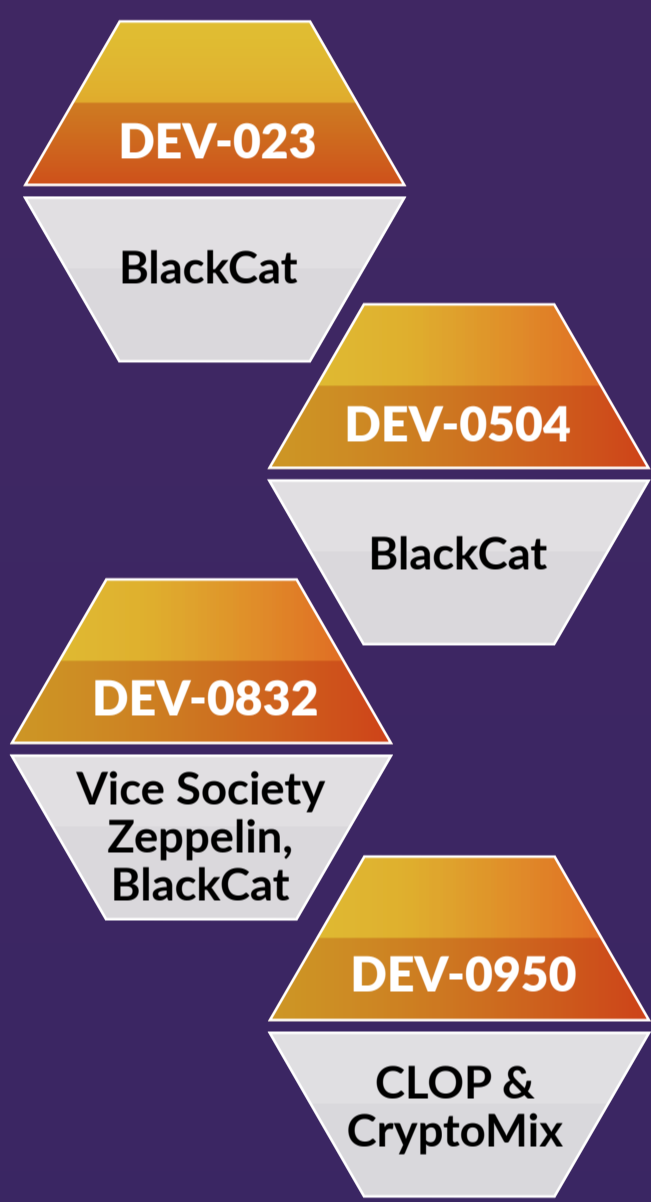

57 Vulnerabilities with the MITRE ATT&CK Kill Chain | 20 Vendors & 81 Products Extremely Vulnerable

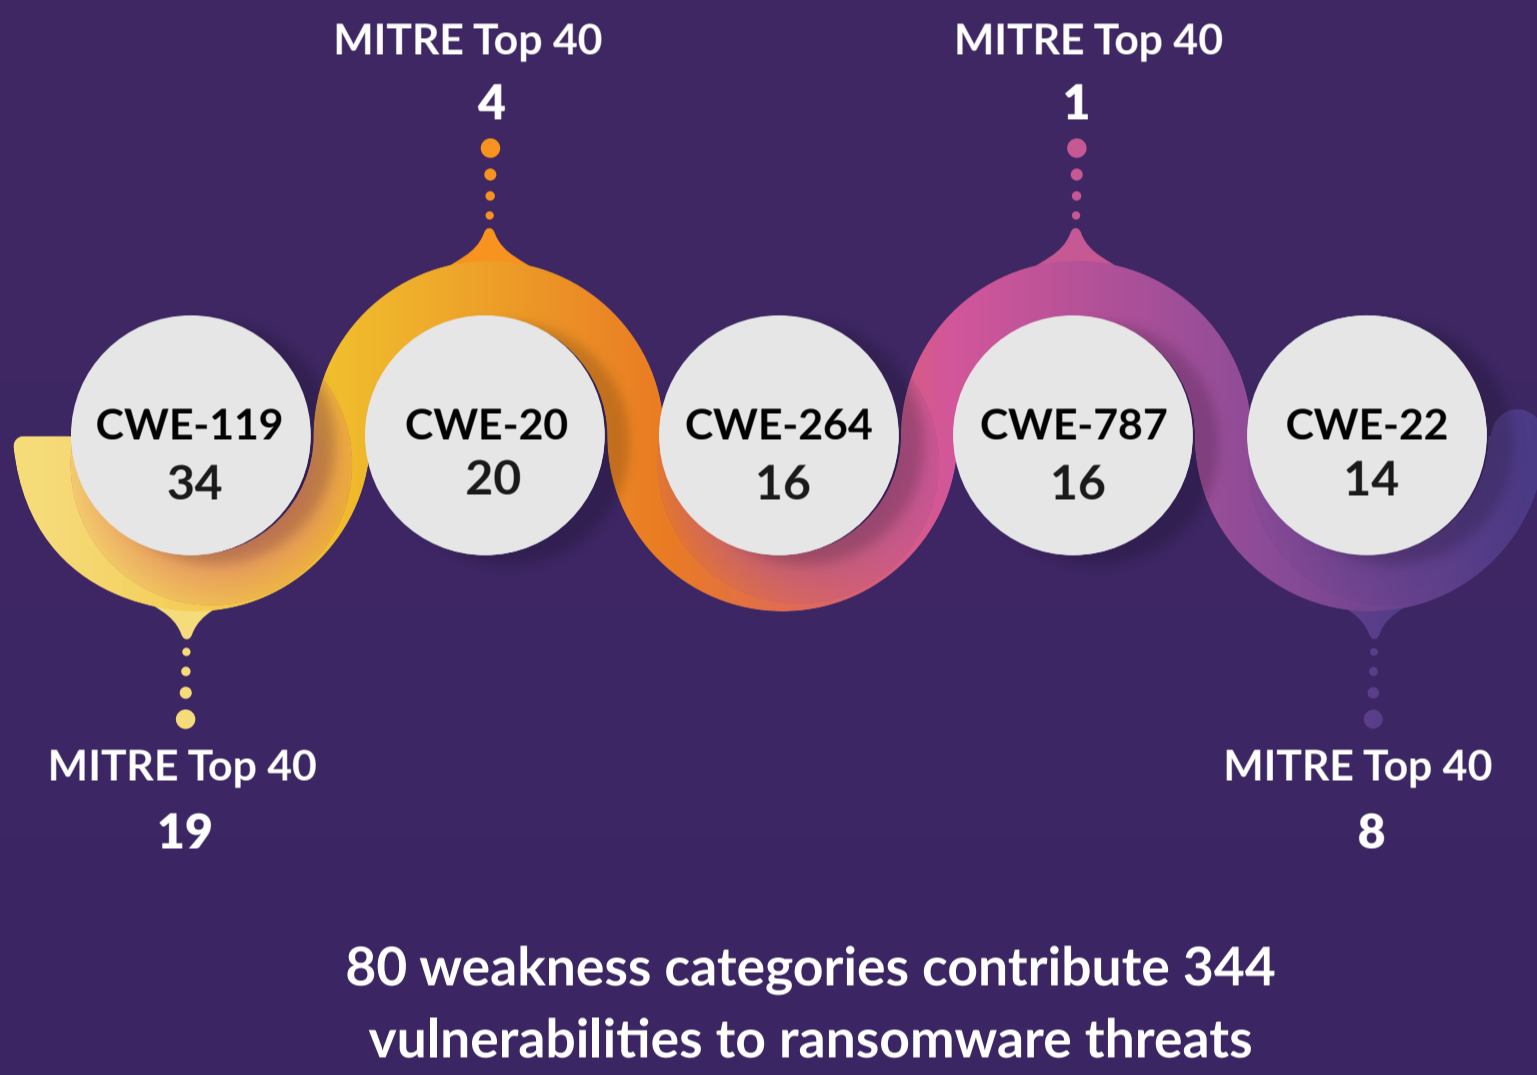

## APT Groups Using Ransomware to Mount Attacks

## Four New APT Groups Deploying Ransomware to Attack Their Targets

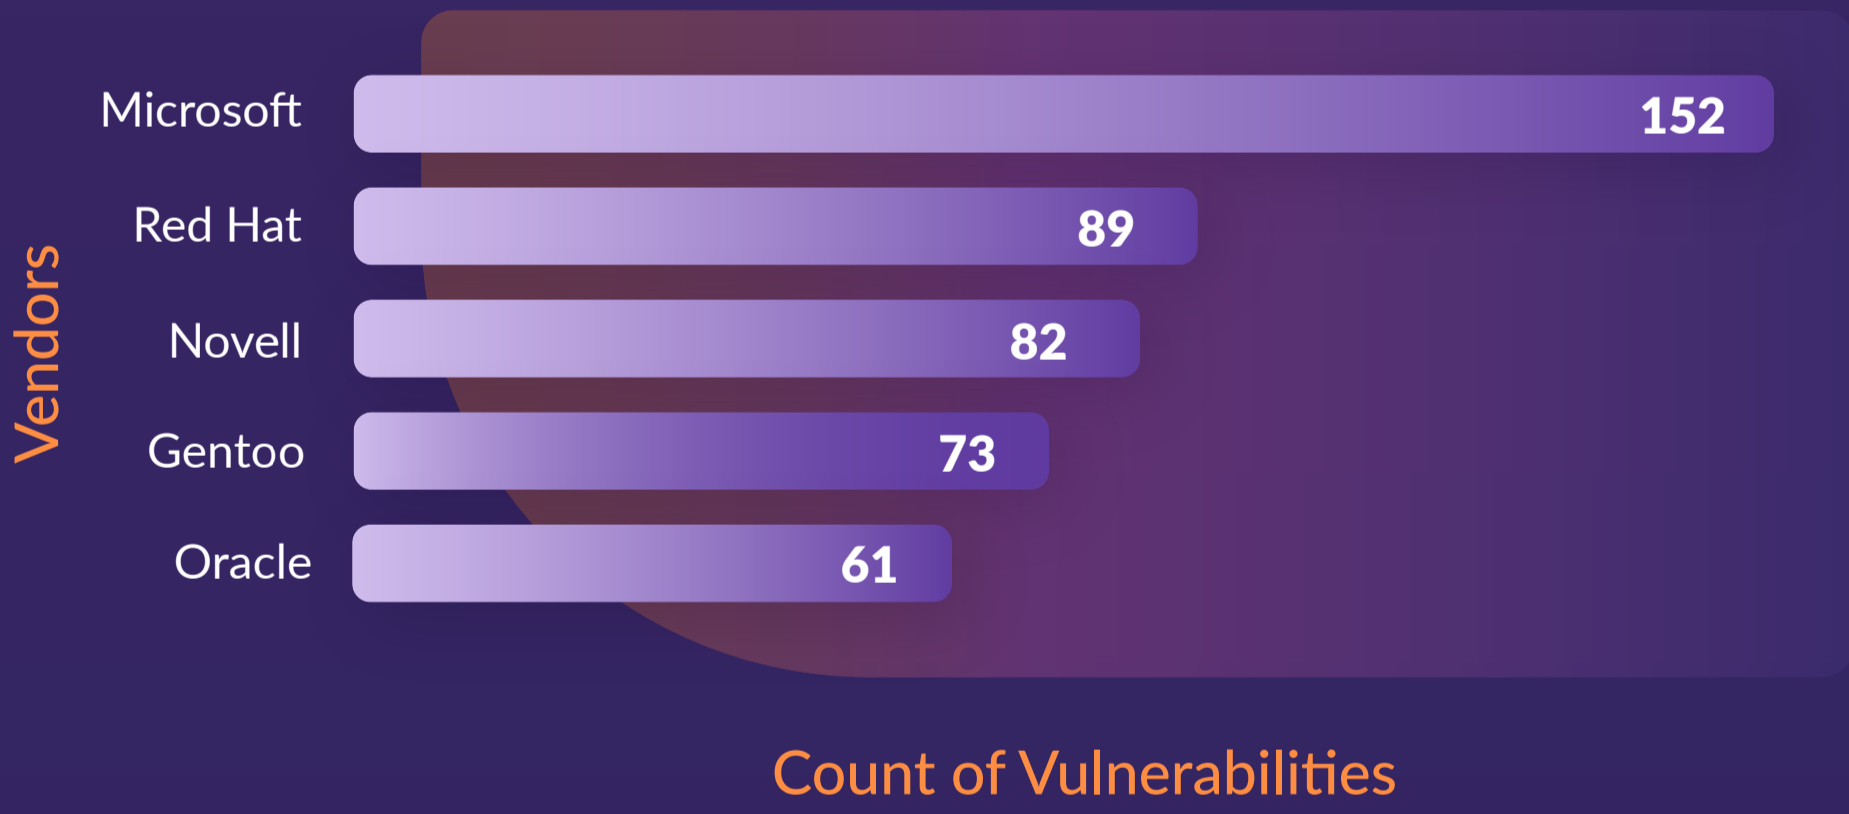

## Top Five CWEs Contributing to Vulnerabilities Associated with Ransomware

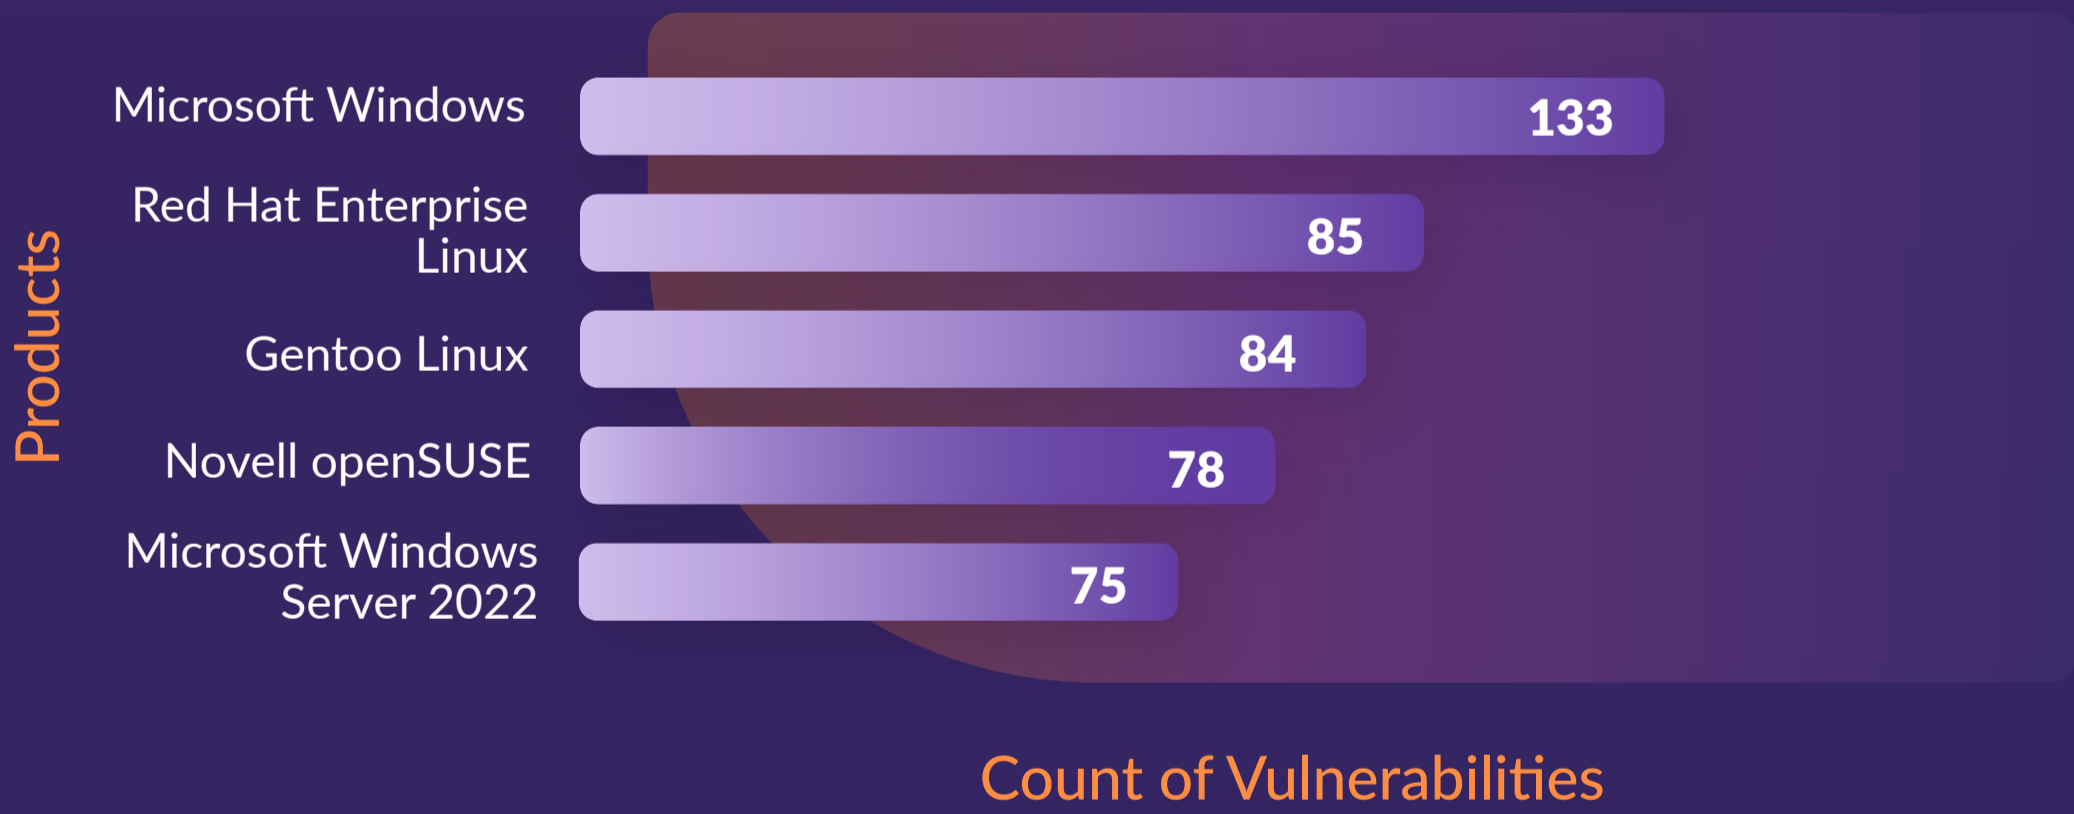

80 weakness categories contribute 344 vulnerabilities to ransomware threats

## Top 5 Vendors Vulnerable to Ransomware

## Top 5 Products Vulnerable to Ransomware

## Snapshot

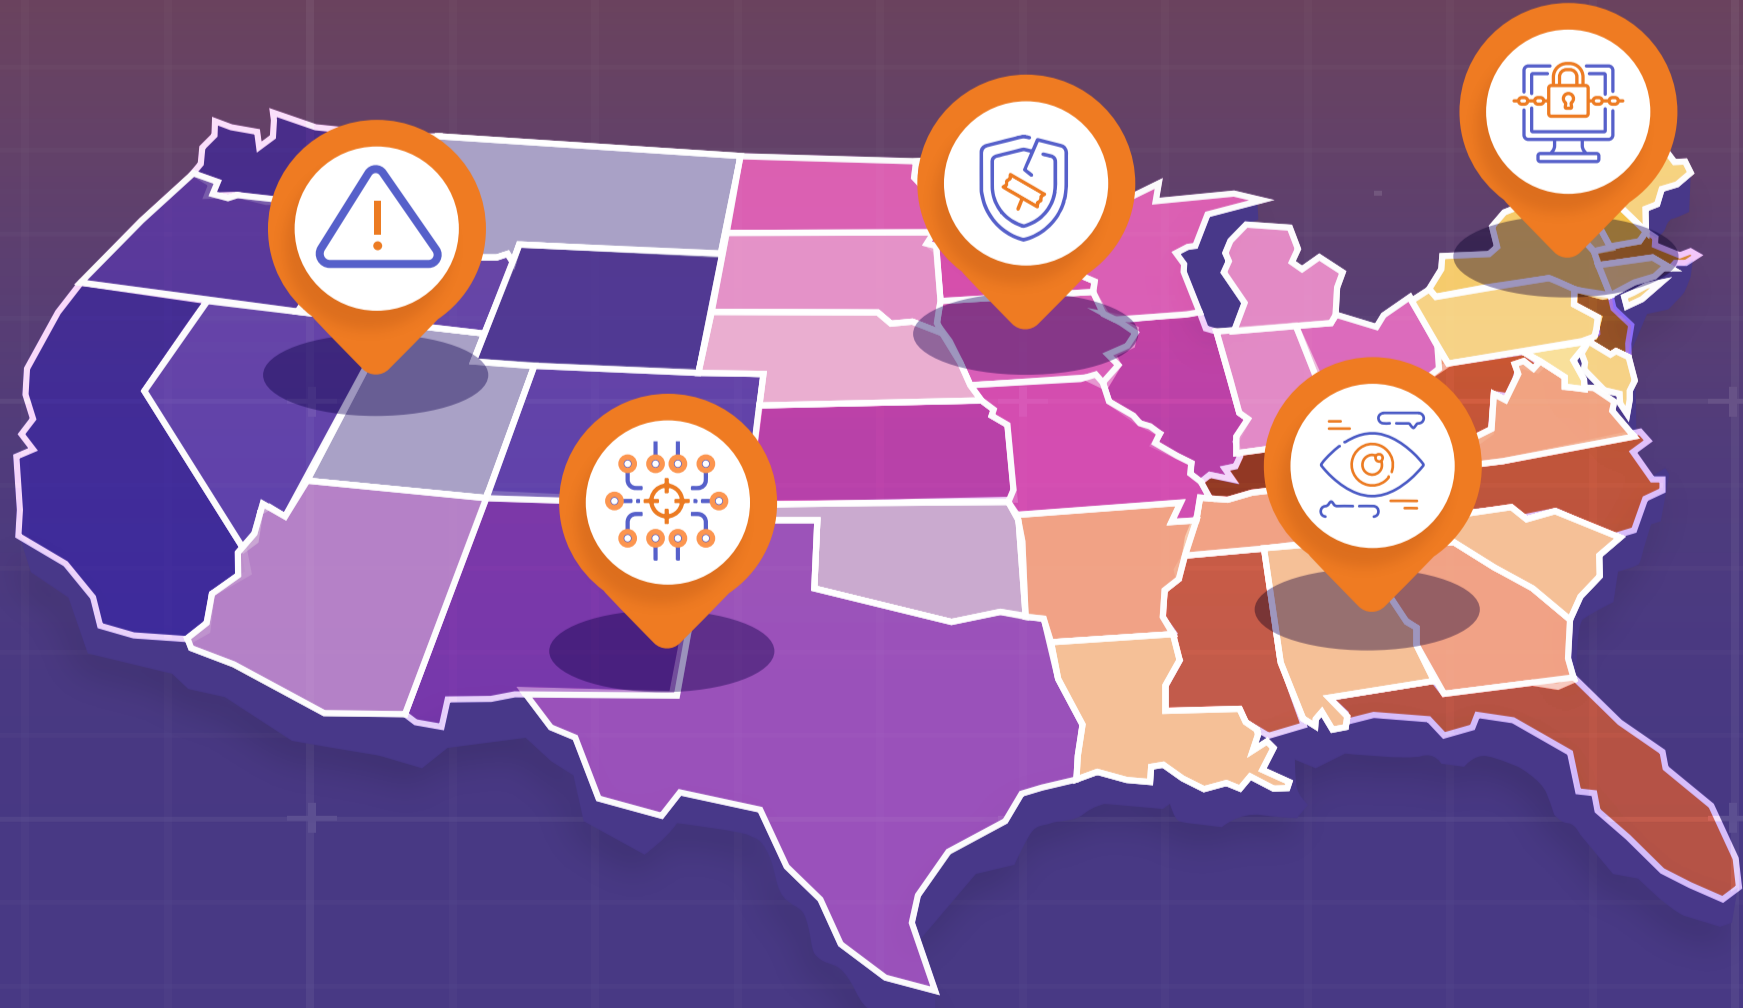

## Cybersecurity in the US States

### Key Highlights from Our Investigation

Huge attack surfaces with poor visibility

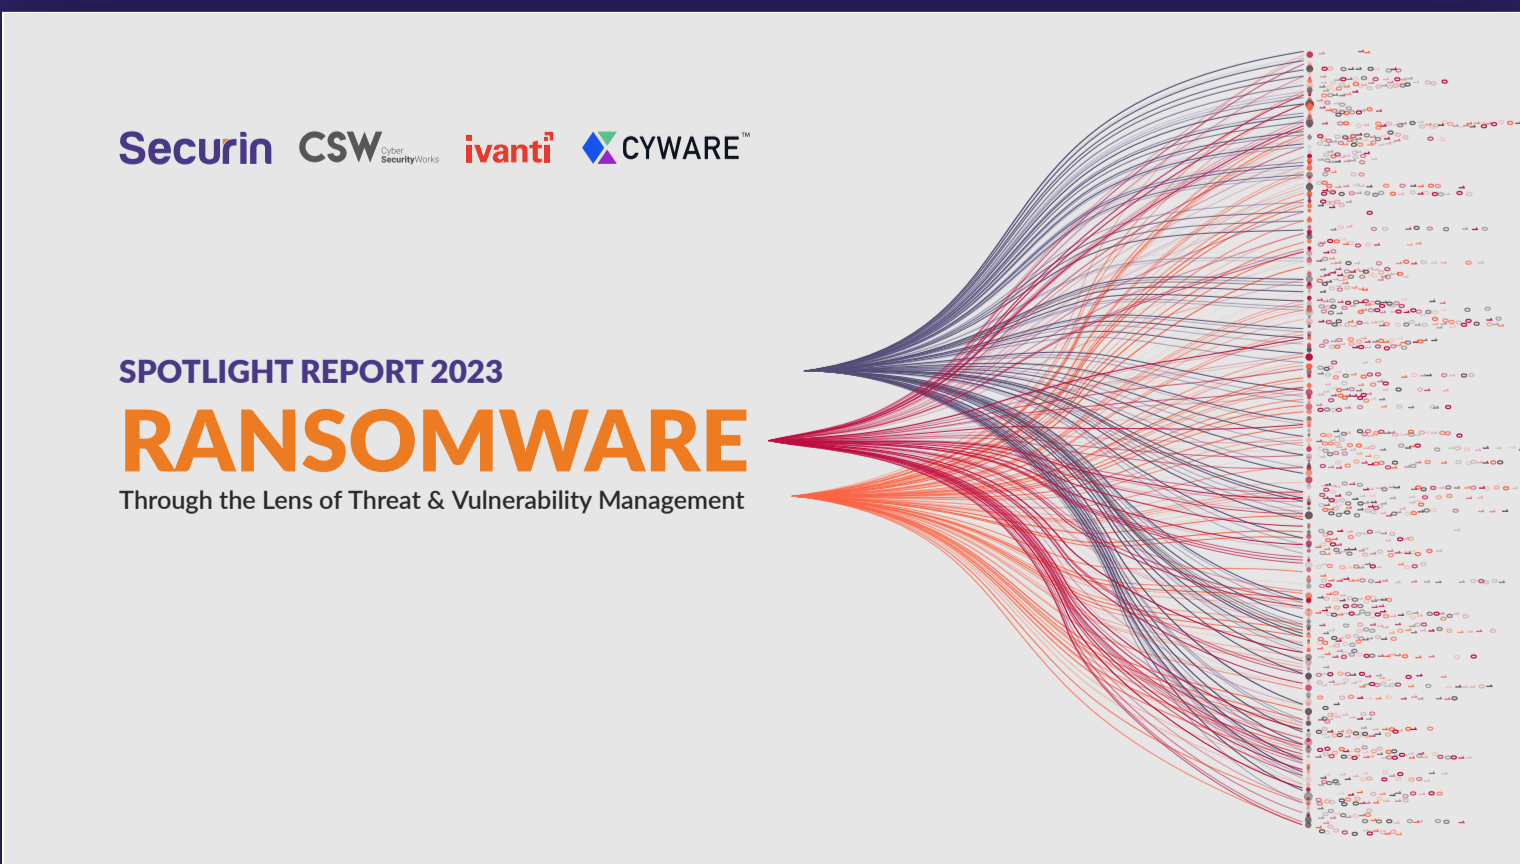

All regions vulnerable to ransomware

Critical exploitable risks

## Spotlight Report 2023

Ransomware Through the Lens of Threat and Vulnerability Management
